Alessandro Pedone

Curriculum Vitae

► PERSONAL DATA

Date of Birth	01/10/2002
Nationality	Italian
Place of Birth	Milan, Italy

► CURRENT STATUS

Politecnico di Milano	Pursuing Master's Degree in Mathematical Engineering, track in Computational Science and Computational Learning
-----------------------	---

► EDUCATION

2024 - Current	Master's Degree in Mathematical Engineering, Politecnico di Milano
2021 - 2024	Bachelor's Degree in Mathematical Engineering, Politecnico di Milano Final grade: 110/110 cum laude Thesis: The Cauchy-Kowalevski theorem and some of its consequences Keywords: PDEs, characteristics method, analyticity/holomorphy, power series, method of majorants, Cauchy-Kowalevski, Holmgren and Cartan-Kähler theorems Supervisor: Prof. Maurizio Grasselli

► EXPERIENCE

01/12/2025 - 03/12/2025	Junior Math Days 2025 <i>Event organized every year by SISSA, with the goal of allowing Master's students in their final year to get in touch with the mathematical research environment (professors and PhD students) at SISSA.</i>
22/09/2025 - 26/09/2025	Workshop and Summer School on Applied Analysis 2025 <i>Organized by TU Chemnitz.</i> Topics: • High-Dimensional Approximations for Parametric and Random PDEs • Inverse Optimal Transport Introduction • Proximal Optimization and Deep Learning Methods (with applications to designing networks architectures) • Data-Driven Methods in Control (focus on Koopman-based techniques) • The Approximation Theory of (Shallow and Deep) Neural Networks

23/06/2025 - 27/06/2025

Theoretical Foundations of Machine Learning 2025

Admitted (as a Master's student) to a selective PhD program organized by MaLGa (Machine Learning Genoa Center) at the University of Genoa, with an acceptance rate of approximately 35%, primarily comprising PhD candidates.

Topics:

- Statistical learning theory framework
- Kernel methods and neural networks
- Empirical risk minimization and regularization
- Reproducing kernel Hilbert spaces (RKHS)
- Optimization techniques: convex analysis, gradient methods, stochastic optimization, splitting methods, backpropagation
- Theoretical analysis: concentration inequalities, empirical process theory, spectral calculus, operator theory, Rademacher complexities

► PROJECTS

04/2025 - Current

Geom-DeepONet (in progress)

Description: surrogate model for the electrostatic part of the physics in an idealized MEMS (Micro-Electro-Mechanical Systems) with varying geometry.

03/2026

Python Workflow Guide

Description: comprehensive guide for building a Python workflow for (scientific computing) projects, mainly aimed at Windows and Linux users with limited terminal experience.

03/2025 - 05/2025

C++ Scientific Computing Projects

1. Some optimization methods for real-valued functions (Gradient Descent, Heavy Ball, Nesterov, ADAM...)
2. Parallel implementations of two kind of solvers for the Poisson equation in the unit square (Schwarz method)
3. Implementation of a matrix class, particularly suited for sparse matrices (CSR/CSC formats and modified formats)

11/2024 - 12/2024

Deep Learning Projects

1. Mars Terrain segmentation of grayscale images (UNet architecture).
2. Blood Cell Classification of RGB images (CNNs and Transfer Learning).

04/2024 - 06/2024

Statistical Inference for Math Performance

Description: a linear regression model for math performance of italian high school students trained on the OECD PISA 2022 survey.

► SKILLS

Programming Languages

Python, C/C++, MATLAB, R, LaTeX

Libraries

NumPy, SciPy, scikit-learn, TensorFlow, Keras, Pandas, Matplotlib, Seaborn, MIP, FEniCS, FEniCSx

Operating Systems

Linux (Ubuntu), Windows

Additional Software

Notion

Memory techniques

Method of loci, Mnemonic major system, Mnemonic link system

► LANGUAGES

Italian

Native speaker

English

C1 (IELTS 7.5)

► HONOURS AND AWARDS

25/01/2023

Premio Migliori Matricole aa 21-22 Classe L 8 Fondo Giovani

Best Freshmen Award, academic year 2021-2022, Class L-8, Fondo Giovani — granted upon completion of the first year of enrollment, based on academic performance, including GPA and the number of ECTS credits earned.

► MEMBERSHIPS

2025 - Current

SIAM (Society for Industrial and Applied Mathematics)

2021 - Current

AIM (Associazione Ingegneri Matematici)

► VOLUNTEERING

2020 - Current

Blood donor

2018

ABCDigital: Liceo Scientifico Elio Vittorini promoted a project to organize a free course for senior citizens, consisting of 10 weekly lectures (2 hours each), aimed at improving their digital skills, device usage, and online awareness.
